So I bought this game thinking "okay, this game is \$3. Dont expect it to be great." Well I was wrong. This game is amazing so far! Granite I have not put an entirely long amount of time into this game. Although I plan to! This game has so many skills I could not decide on what to upgrade. Which I like about games. Always making me think before I choose something. Great crafting, a lot of that, Exploring is fun. The combat I have never seen before, so when I first saw I was a little nervous, but it is really fun. It is like a combination of Fruit Ninja and Child of Light. Which might sound weird but it works really well. Really cool amazing game. Being \$3. Definitely worth it! This is exactly what I have been looking for. Anyone who is looking for an rpg survival game with story and lots of content, You have found it. I know this game just came out, but do you have any ideas for maybe adding DLC into the game? Or just adding more? I know there is a lot now, but I already want more :) 10/10 from me.. I feel like it's getting more difficult to find turn-based RPGs with an engaging story. That said, Second Death was the best \$3 I ever spent. The tutorial was a breeze, and the story mode is so well-envisioned, I didn't mind dying over and over to get more pieces of it.
